Office Action Summary

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7-9, 13 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Stafford, as set forth in the previous office action, Paragraph No. 2, Paper No. 4.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 49 is rejected under 35 U.S.C. 102(b) as being anticipated by Stafford, as set forth in the previous office action, Paragraph No. 4, Paper No. 4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3764

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stafford in view of Giori, as set forth in the previous office action, Paragraph No. 6, Paper No. 4.

Claims 10-12, 14-20, 43-44 and 50-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stafford in view of Starr, along with Moy, as set forth in the previous office action, paragraph no. 7, Paper No. 4.

Note: Claim 18, was inadvertently indicated as being allowable.

Crangle teaches in figures 1-4 a pressure applicator that is attached to a chamber 40. The pressure applicator is placed around the user's neck. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the pressure applicator as taught by Crangle could be incorporated into the endotracheal intubation device disclosed by Stafford and taught by Starr and Moy in order to use the pressure applicator to apply pressure to the user's neck at the cricoid cartilage as taught by Crangle.

Allowable Subject Matter

Claims 21-41 and 45-48 are allowed.
